PERSONAL PROJECTS

Netflix Clone (06/2025 - 06/2025)

- Built a Netflix-inspired web application replicating the UI and functionality using React.js, providing a hands-on understanding of modern frontend techniques.

E-Commerce Website (07/2025 - 07/2025)

- Built with React.js, HTML, and CSS featuring product listings with filters, search, and add-to-cart functionality. Designed a responsive, modern UI and enhanced frontend skills; planned future updates include authentication, payments, and backend integration

Hospital Management System (10/2025 - 11/2025)

- Developed a web-based ERP module to manage hospital operations such as patient records, doctor details, appointment scheduling, and billing. Implemented responsive UI using HTML, CSS, Bootstrap and JavaScript improving data organization and workflow efficiency.

Employee Management System (05/2026 - Present)

- Currently developing an ERP-based module to manage employee records, attendance, department details, and payroll information. Designed responsive user interfaces using HTML, CSS, Bootstrap, and JavaScript while working with ASP.NET MVC and SQL Server for data management.
